Web Developer Assignment

Summary

Create a web application using low code platform like budibase.com. Approximate effort required – 2 days

The Story

Krishna owns a roadside chaat stall – 'Krishna Chaats' in Bangalore. In the evenings, he gets very busy and struggles to keep up with the orders as there is a huge rush at his stall. Fortunately, he has a mobile phone and knows how to use a browser like chrome.

Task

Create a web application using low code platform budibase.com to help Krishna's customer place orders and to help Krishna receive those orders.

1. User Interface

Krishna's customers will be using this interface to place orders. The menu has only 3 items –

Paani Puri - ₹ 20 per plate

Sev Puri - ₹ 30 per plate

Dahi Puri - ₹ 40 per plate

2. Admin Interface

Krishna will be using this interface to prepare the orders and collect money.

He should be able to see the list of orders and the details of each order too.
